

Skill Evolution Format Fixture

Version: 1.2
Effective date: 2026-07-26
Replay budget: 13 runs
Reference: <https://example.org/skill-evolution/policy>

Decision

Automatic candidate replay must stop when sandbox preflight fails. It must never fall back to the host.

Constraints

Correctness and capability coverage are hard constraints.
Every candidate and failed attempt remains visible.
Only a human may approve release of a candidate skill.

Metrics

Dimension	Baseline	Guardrail
Correctness	Required	No regression
Token usage	Measured by component	Report variance
Duration	Measured per run	Report outliers

Limitation

Visual preference is not inferred from deterministic metrics; screenshots require human review.
